

## **FIKSER RECAPS FIRST TWO YEARS, ANNOUNCES KARMA PRODUCTION SCHEDULE**

In little more than two years Fisker Automotive has established itself as a force in the automotive industry.

Significant investments from major venture capital firms, a half-billion dollar conditional loan from the U.S. government and the establishment of a global network of independent retailers highlight the new American automaker's rapid growth. Since its founding in August 2007 Fisker Automotive has:

- Assembled a team of forward-looking auto industry veterans with more than 200 years of collective experience
- Introduced the world's first premium plug-in electric hybrid vehicle, the Fisker Karma
- Established global headquarters in Irvine, California and a first-class engineering facility in Pontiac, Michigan
- Appointed a network of 42 independent U.S. retailers and three European distributors with proven track records in customer satisfaction (visit [www.fiskerautomotive.com](http://www.fiskerautomotive.com) for list);
- Partnered with Tier I automotive suppliers
- Applied for more than 50 patents
- Been awarded a \$528.7 million U.S. Department of Energy conditional loan
- Announced Project Nina, the development of an affordable, family-oriented plug-in hybrid for 2012 that will ultimately create more than 5,000 U.S. jobs
- Signed a letter of intent to purchase an assembly plant in Wilmington, Delaware
- Secured more than 1,500 customer deposits;
- Been featured on the cover of the June 8, 2009 issue of *Forbes* magazine as "The Next Detroit."

In third quarter 2010 Fisker Automotive will begin delivering Karma plug-in hybrids to appointed retailers and distributors worldwide, less than 36 months after the concept car first appeared at the North American International Auto Show in Detroit in 2008.
